INTRODUCTION

The National Library of Medicine selects journals for *Index Medicus*® with the advice and guidance of a group of advisors that includes physicians, scientists, medical librarians, and editors of a number of American medical journals. Technical support for the review of specific publications is drawn from additional specialists in all areas of biomedicine. The advisors have the continuing, difficult task of evaluating old and new journals for indexing in MEDLARS® (Medical Literature Analysis and Retrieval System) to ensure that they satisfy the requirements for quality, coverage, comprehensiveness, and scope for which the Library has been striving in its indexes for over 100 years.

The Library indexes the periodical literature that has been judged most useful to *Index Medicus* users. It is not possible to include every journal that might contain useful articles and more journals are recommended for inclusion than can actually be indexed. An effort is made to maintain a reasonable balance of subject matter. The inclusion of a journal should not be construed as indicating that it is considered superior to one that is not indexed.

The 2,938 journals being indexed for *Index Medicus* as of January 1980 are listed in four sections:

(1) Alphabetic listing by abbreviated title, followed by full title;
(2) Alphabetic listing by full title, followed by abbreviated title;
(3) Alphabetic listing by subject field; and
(4) Alphabetic listing by country of publication.

In addition, there are three introductory sections which list titles that have been newly selected for indexing during the past year, title changes that occurred during the past year, and titles that are no longer indexed because they either ceased publication or were deselected as titles to be indexed for *Index Medicus*.

Updated information about titles newly selected for indexing, title changes, and titles no longer indexed is provided monthly in the *NLM Technical Bulletin*. In addition, the July issue of *Index Medicus* contains a cumulative list of all journals selected for indexing or that have changed title since the previous *List of Journals Indexed in Index Medicus* was published.

FILING ORDER

Entries in the title abbreviation section are filed letter by letter. Full title entries are filed according to the alphabetic sequence of the keywords in the titles. Initial articles, conjunctions and prepositions are ignored. Numbers file after letters.

* * *

The symbol "A" is used before the titles of those journals which are indexed selectively, i.e., indexed only for articles relating to the field of biomedicine. The symbol "*" identifies journal titles which are indexed in *Abridged Index Medicus*.

ABBREVIATIONS OF JOURNAL TITLES

Currently, the journal title abbreviations used in *Index Medicus* are formulated according to the rules of the American National Standard for Information Sciences – Abbreviation of Titles of Publications, ANSI Z39.5-1985,[1] except for the treatment of part or section designations and the omission of special characters and symbols and hyphens in compound words. Title abbreviations formulated under earlier guidelines have been retained in a few cases.

CITY OF PUBLICATION

City of publication is based on the location of the following, in order of choice: (1) major publisher; (2) minor publisher with distinctive imprint; (3) official sponsoring body (society, academy, institution, drug company, government agency, etc.); (4) editorial office of the official sponsoring body; (5) business office of the sponsoring body; (6) printer.

The spelling of the city of publication is taken from an issue of the journal itself and consequently may differ from title to title. For example, English language journals published in Copenhagen will usually have Copenhagen as a city of publication. Danish language journals may have Kobenhavn.

NLM CALL NUMBER

The National Library of Medicine call number is the shelving location for a serial in the NLM collection. In the *List of Journals Indexed in Index Medicus*, the NLM call number appears at the end of each entry in the Abbreviation and Full Title Listings.

NLM TITLE CONTROL NUMBER

The NLM title control number (UI in SERLINE®), consisting of nine alphanumeric characters, serves as NLM's unique identifier for each title. It is also used by medical libraries in reporting serials holdings data to SERHOLD® , NLM's database of machine-readable holdings statements for serial titles held by U.S. biomedical libraries. The title control number appears opposite the NLM call number.

INTERNATIONAL STANDARD SERIAL NUMBER

The International Standard Serial Number (ISSN) is a serial identifier consisting of a unique seven digit number and an eighth check digit. The ISSN uniquely identifies a serial title, regardless of language and is therefore useful in international information exchange and in machine storage of serials data. The ISSN is assigned to a serial title by the appropriate national center of the International Serials Data System (ISDS). The National Serial Data Program (NSDP) of the Library of Congress is the United States Center of the ISDS. The ISSN is irrevocably linked to the key title of the serial. If the title of a continuing serial changes, a new ISSN must be assigned to the new title. In the *List of Journals Indexed in Index Medicus*, the number, if known, is preceded by the abbreviation ISSN.

SUBJECT HEADINGS

All subject headings used are from the most recent edition of NLM's controlled vocabulary, Medical Subject Headings (MeSH)®. The appropriate medical specialty is used as a descriptor whenever possible instead of an organ or disease. That is, DERMATOLOGY is used as a subject heading for JOURNAL OF CUTANEOUS PATHOLOGY rather than SKIN or SKIN DISEASES. When a specific heading applies to only one or two titles, a more general heading is assigned.

* * *

When requesting serial interlibrary loans from the National Library of Medicine, include the NLM call number (or On Order or In Process notation) and the NLM title control number. When reporting errors or questioning entries, please indicate the NLM control numbers for the titles involved.

The *List of Journals Indexed in Index Medicus* is produced from SERLINE® (SERials on LINE), the National Library of Medicine's online serials database. Questions or comments on the information in this publication should be directed to: Head, Serial Records Section, Technical Services Division, National Library of Medicine, Bethesda, Maryland 20894.

PERMANENT PAPER NOTICE

Beginning with the 1990 issue of the LJI, entries for indexed journals known to be printed on acid-free paper and to carry a notice to that effect contain the designation 'ACID-FREE'. The ACID-FREE notice appears following the ISSN, or if there is no ISSN, after the place of publication.

To report other IM journals printed on acid-free paper or to obtain information about permanent paper and how to indicate its use, contact: Special Projects Officer, National Library Medicine, 8600 Rockville Pike, Bethesda, MD 20894
